

Initiatives for Solving Social Issues

Mitsubishi Electric's initiatives

Mitsubishi Electric Group Materiality

In order to realize a "vibrant and sustainable society," Mitsubishi Electric has identified five areas as materiality (important challenges) that we will particularly prioritize in our activities aimed at sustainability. We will actively disclose information on the status of our materiality efforts and promote engagement with stakeholders.

Provide solutions to social challenges through our business	Realize a sustainable global environment
	Realize a safe, secure, and comfortable society
Strengthen our business foundation to enable sustainable growth	Respect for all people
	Strengthen corporate governance and compliance on a sustainable basis
	Create a sustainability-oriented corporate culture

SDGs we are primarily focused on

3 GOOD HEALTH AND WELL-BEING	7 AFFORDABLE AND CLEAN ENERGY	9 INDUSTRY, INNOVATION AND INFRASTRUCTURE	11 SUSTAINABLE CITIES AND COMMUNITIES	13 CLIMATE ACTION
------------------------------	-------------------------------	---	---------------------------------------	-------------------

We have newly added the below two SDGs
 3 GOOD HEALTH AND WELL-BEING
 9 INDUSTRY, INNOVATION AND INFRASTRUCTURE

Particularly relevant SDGs

5 GENDER EQUALITY	8 DECENT WORK AND ECONOMIC GROWTH	10 REDUCED INEQUALITIES	16 PEACE, JUSTICE AND STRONG INSTITUTIONS
-------------------	-----------------------------------	-------------------------	---

Initiatives for FA system business

For factories that account for a high percentage of energy consumption, we provide devices and equipment with high energy-saving performance, contributing to the realization of carbon neutral.

We contribute to solving labor shortages and the creation of safe/comfortable working environments through integration of FA devices on automated equipment and robot development aimed at labor-saving.

Through integration of FA devices on factory equipment and robot control technology, we support medical practitioners and large-volume production of hygiene products.

SDGs: Sustainable Development Goals: A set of goals slated by the United Nations General Assembly (UN-GA) intended to be achieved by the year 2030.
