

# Unlock Performance with Total Drive Solutions MELSERVO-J5

Automating the World

## MITSUBISHI ELECTRIC SERVO SYSTEM **MELSERVO-J5** Unlock Performance with a **Total Drive Solution**

### PROGRESSIVENESS

For evolution  
of machines

### CONNECTIVITY

For flexible system  
configuration

### MAINTAINABILITY

For prompt detection and  
diagnosis of failures

### HERITAGE

For utilization of existing  
devices

### USABILITY

For quick  
operation start

The MELSERVO-J5 from Mitsubishi Electric is a Total Drive Solution designed to not only enhance the performance of systems and equipment but also optimize your machine productivity with high speed and precision. Engineered to support flexible configurations and easy device integration, the MELSERVO-J5 streamlines your production operations with real-time detection and diagnosis features. This enables effective predictive maintenance, reducing machine downtime and maximizing production efficiency.

With connectivity capabilities through CC-Link IE TSN, our servo system offers high compatibility with IoT (Internet of Things) technology, opening new opportunities for value creation with well-integrated connected devices. Another advantage lies in its user-friendly operation and utilization, facilitating smooth integration and enhancing efficiency in Manufacturing Industries.

With MELSERVO-J5, you can create a leading-edge Total Drive Solution that not only boosts performance but also ensures your system remains competitive in the current era of Industry 4.0. Take a step forward towards the future of your production with Mitsubishi Electric Factory Automation.
