

# Toward Carbon Neutrality

## Supporting Sustainable Manufacturing with Mitsubishi Electric

### EMPOWERING SUSTAINABLE GROWTH WITH MITSUBISHI ELECTRIC'S TOTAL SOLUTION:

Mitsubishi Electric empowers sustainable manufacturing with energy-efficient equipment, IoT insights, and smart control systems — helping businesses cut CO<sub>2</sub>, boost efficiency, and drive a greener future.

With global attention turning toward decarbonization, industries are under pressure to reduce emissions while maintaining productivity. Mitsubishi Electric recognizes this challenge—and as a leader in automation and control technology, we’ve made carbon neutrality a central mission in our business strategy.

### Our Commitment to a Decarbonized Society

Mitsubishi Electric supports the transition to a low-carbon society by delivering not only energy-efficient factory automation and power distribution equipment, but also by providing advanced digital tools that help manufacturers optimize energy use.

We help our customers pursue sustainability through 3 approach:

- **Smart FA and Power Equipment:** Built with energy efficiency as a purpose, our hardware contributes directly to reduced power consumption.
- **IoT Platforms:** Integrated monitoring systems collect and share equipment data in real time, enabling better energy management.
- **Visualization & Analytics Tools:** Applications for diagnostics, analysis, and visualization allow users to see where energy is used and where savings can be made—empowering smarter decision-making.

By combining cutting-edge automation with data intelligence, Mitsubishi Electric supports businesses in aligning their operations with global decarbonization goals, without compromising on performance or reliability.

Let's Build a Smarter, Greener Future. Join us in shaping a cleaner tomorrow.
