

Building Management System (BMS) Allows Building Owners to Easier Control and Lower the Energy Consumption

Automating the World

Building Management System (BMS) Lower Energy Consumption and Easier Control for Building Owners

Application on Building Management System

The hardest challenge in the construction of commercial buildings, industrial and residential is to maximize profitability from investment and assets, also minimize operational cost-effectively, therefore Building Management System (BMS) is needed.

Our innovative Building Management System (BMS) solutions, allows you to centrally manage a single building or multiple buildings across the country, also helping you to keep operational costs low and lower energy consumption by optimizing the management of a multitude of systems from Lighting Control, Ventilation Air Conditioning (HVAC), and Energy Monitoring System. The systems are supported by trend reports and analysis functions to help you to get insights into the conditions of building operations supported by products from Mitsubishi Electric.

Then you can Maximize Control, Savings, and Efficiency of operational building with our Building Management System (BMS) solutions.
